

DATA SHEET

Engage™ v5.0

TURBOCHARGE MAPINFO PROFESSIONAL™ WITH EXTENSIVE PRODUCTIVITY TOOLS.

Summary

Engage version 5.0 is a powerful suite of tools that extend the efficiency and analytical capabilities of MapInfo Professional.

Benefits

- Efficient control of your workspace, including map window tools and advanced selection options.
- Powerful real-time data visualisation and interaction.
- Fast map output - both scaled and customised.
- Simple image rectification at your fingertips.
- Valuable temporal analytics enable exploration of the 4th dimension to uncover data trends in hard-to-find places.

OVERVIEW

The Pitney Bowes Business Insight Engage software suite takes MapInfo Professional capabilities to the next level. By building on its already powerful Geographic Information System (GIS), Engage converts MapInfo Professional into a sophisticated and easy-to-use tool for managing, manipulating and displaying virtually any geographically-related data set. The Engage product suite enables users to process and view data in ways that previously required various software packages.

Engage v5.0 provides a variety of new functions and efficiency tools to increase user productivity and efficiency. This new functionality includes a new Data Clock display type that enhances GraphMap's temporal analytical capabilities, a time-saving search function for finding Engage v5.0 tools by keyword or tool name, and a range of other general improvements.

EngageAnalytics Improvements

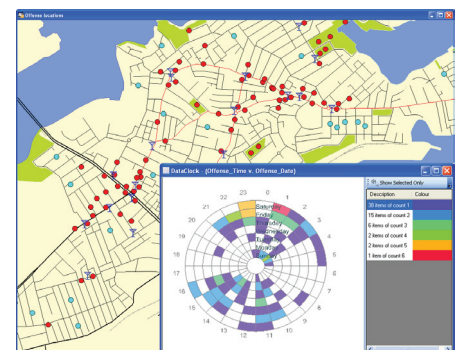

New Data Clock graph type

The new Data Clock graph type is ideal for time/frequency or temporal analysis, such as:

- Pollution monitoring in streams
- Water or salinity-level monitoring in bores
- Sewerage/water discharge rates
- Wind direction-related data.

A variety of date or time intervals can be extracted from the date/time field and displayed as either exterior wedges or interior circles of the clock. These date/time intervals include:

- Year
- Month of Year
- Day of year
- Day of Month
- Day of Week
- Hour of Day
- AM/PM
- Minute of Hour
- Second of Minute
- Unique

Combine time and location analysis of crime data using GraphMap's new Data Clock display type.

GraphMap tool enhancements

- New visibility control, for filtering displayed points based on a grouping or filter field.
- Data preconditioning converts between data field types and includes a data preview.
- Redesigned Graph Builder wizard for more interactive graph creation.
- Customisable pie chart graph colours.
- Improved setup of multiple table relationships.
- Improved date/time support on graphs.

Point Classifier enhancements

- Improved processing speed

New Create Registered Raster tool

- Capture a map window as an ECW image.

General Improvements

- Support for MapInfo Professional v10.0.
- Direct link to our regularly updated and searchable online Pitney Bowes Business Insight Knowledge Base.
- New Command Search function - either by tool name or keywords - means no more browsing through multiple menus to find that elusive tool.
- New Transparency/Translucency slider available in the Enhanced Layer Control for vector, raster and grid layers in MapInfo Professional v10.0 or later.
