

DATA SHEET

Australian Mineral Tenements

STAY UP-TO-DATE WITH THE LATEST TENEMENT INFORMATION WITH A NEW ONLINE DATA SERVICE..

Summary

The redesigned Encom™ Discover tenement module provides an interactive interface and supports the subscribing and downloading of the latest Australian mineral tenement data.

Benefits

- Updated regularly.
- Eliminates dealings with multiple agencies.
- Works directly with the Encom Discover tenement module.
- Consolidated dataset.
- Enables user to choose individual states or the entire country.
- Downloads directly from the Pitney Bowes Business Insight server to your desktop in WFS format.

OVERVIEW

Pitney Bowes Business Insight provides an online subscription service for Australia-wide mineral tenement data. This data is hosted and delivered via an online Pitney Bowes Business Insight server and accessed from the tenement module within Encom™ Discover.

Discover is the desktop Geographical Information System (GIS) designed for the geosciences, providing tools to effectively compile, visualise, analyse and map spatial geoscience data. By integrating data from multiple sources into a unified geospatial environment, Discover provides leading-edge tools in a powerful, yet easy-to-use framework.

Additionally, Discover unlocks the power of Pitney Bowes Business Insight's MapInfo Professional™. The combination of Discover and MapInfo Professional delivers the perfect balance of general purpose GIS functionality and specialised geoscience capabilities.

Encom Discover Tenement Module

The Discover tenement module has been completely redesigned in version 11.0, to provide an interactive interface for creating new applications, searching through existing tenement data and downloading regular tenement updates for the country. Utilising the Pitney Bowes Business Insight mineral tenement data, it is very easy to:

- Perform straightforward tenement queries by date, licence type and holder information.
- Create polygonised block and sub-block reference grids.
- Generate new or modify existing tenement applications by selecting sub-blocks manually or interactively.
- Produce tenement application reports, automatically.

Subscription Requirements

The Discover mineral tenement data is only accessible through the subscription service. Therefore, to gain full and easy access privileges, users must subscribe to the service and obtain a user name and password.
