StreetPro Vietnam

STREETPRO VIETNAM IS THE PREMIER STREET NETWORK DATABASE FOR VIETNAM. IT HAS BEEN DESIGNED TO PROVIDE USERS WITH A FLEXIBLE, MULTI-PURPOSE FOUNDATION WITH THE APPROPRIATE INTEGRITY FOR CRITICAL BUSINESS USE.

Summary

StreetPro Vietnam is a high quality digital road network that gives you real-world detailed display with the spatial accuracy and attribution you need to define your spatial business solution. This product is ideally suited to a wide variety of mapping analysis and reporting applications, as well as in the integration of transport and logistics platforms, and corporate information solutions.

Benefits

- Data standards compliance to support business compliance.
- Fast and efficient integration with Pitney Bowes Business Insight's suite of geospatial applications.
- Comprehensive and current for informed decision making.

OVERVIEW

Does your job include mapping or location-based analysis? Do you need a detailed Vietnamese street network for address geocoding, routing, or mission critical activities such as risk analysis and network planning? Do you require a general overview of streets throughout Vietnam to analyse a market or site, or eye catching maps to present your analysis? If the answers to any of these is "yes" - you need quality spatial reference data - you need StreetPro.

Offering high quality up-to-date and comprehensive street coverage for Vietnam, StreetPro is the essential solution to your mapping and location-based application requirements. StreetPro is built on data from the industry's most respected sources and enhanced by Pitney Bowes Business Insight with value added features and topological integrity, to provide you with an easy-to-use product that provides a reliable foundation for business needs.

Why StreetPro?

StreetPro offers reliable Vietnamese data from a single source. Annual updates ensure that you always have the most up-to-date and accurate data to work with. StreetPro is flexible - you can purchase data that matches your business needs, choose from national coverage, capital city, or Internet deployment ready. Consistent file structures and presentation means it is easy to conduct your analysis, whatever regions or layers you

choose. It is the choice for customers who need to perform accurate location analysis to support critical business decisions and who value real-world, high integrity content for analysis and maps.
